PROJECT DESCRIPTION

Name of Project <i>(As it appears in the 2017 State Water Plan)</i>	Seawater Desalination and Variable Salinity Program			
Where can the project be found in the most recent Regional Water Plan?	Project described on page:	5D.9-1	Capital costs listed on page:	5D.9-10
Phase(s) Applied For	<input checked="" type="checkbox"/> Planning <input type="checkbox"/> Acquisition <input type="checkbox"/> Design <input type="checkbox"/> Construction			
Population Served When Fully Operational	Over 500,000			

Description of Proposed Project

A Consortium of industrial and municipal stakeholders has completed a feasibility study for the implementation of a seawater desalination plant in the Corpus Christi Bay Area. The intent of the Consortium is to conduct project definition and planning studies for implementing a full-scale seawater desalination project. This funding application is to address those preparation and definition activities which will include recommendation of a project implementation agency, a plant siting evaluation, infrastructure integration planning, source water characterization, economic impact and cost modeling, public outreach, analysis of concentrate management methods, evaluation of cost allocation strategies, evaluation and selection of a project procurement methodology.

Emergency

(select all that apply)

- Applicant/entity's water supply will last less than 180 days.
- Water supply need occurs earlier than anticipated in the State Water Plan.
- Applicant has received or applied for Federal emergency funding.
- None of the above.
